Sri Lanka

Endemic Birds & Big Game

14th to 25th March 2028 (12 days)

Serendib Scops Owl by Daniel Danckwerts

This tour offers a superb exploration of the Indian Subcontinent's avian riches, beginning with a comprehensive journey across Sri Lanka, an island renowned for its exceptional endemism and biodiversity, and followed by an optional extension to northern India's Ranthambore National Park, home to one of the world's most celebrated concentrations of large mammals and dry-zone birds.

The main tour journeys through Sri Lanka's most productive birding regions, from the lush Kitulgala Rainforest to the montane grasslands of Horton Plains, and onward to the dry lowlands of Yala and Uda Walawe National Parks, before culminating in the misty forests of Sinharaja, a UNESCO World Heritage Site. Across these varied habitats, we will target Sri Lanka's 34 endemic bird species, with excellent chances of recording them all, including standouts such as the striking Sri Lanka Blue Magpie, elusive Serendib Scops Owl, Sri Lanka Spurfowl, and Red-faced Malkoha. The country's rich mammal and butterfly fauna, scenic tea country, and warm hospitality add even more depth to the experience.

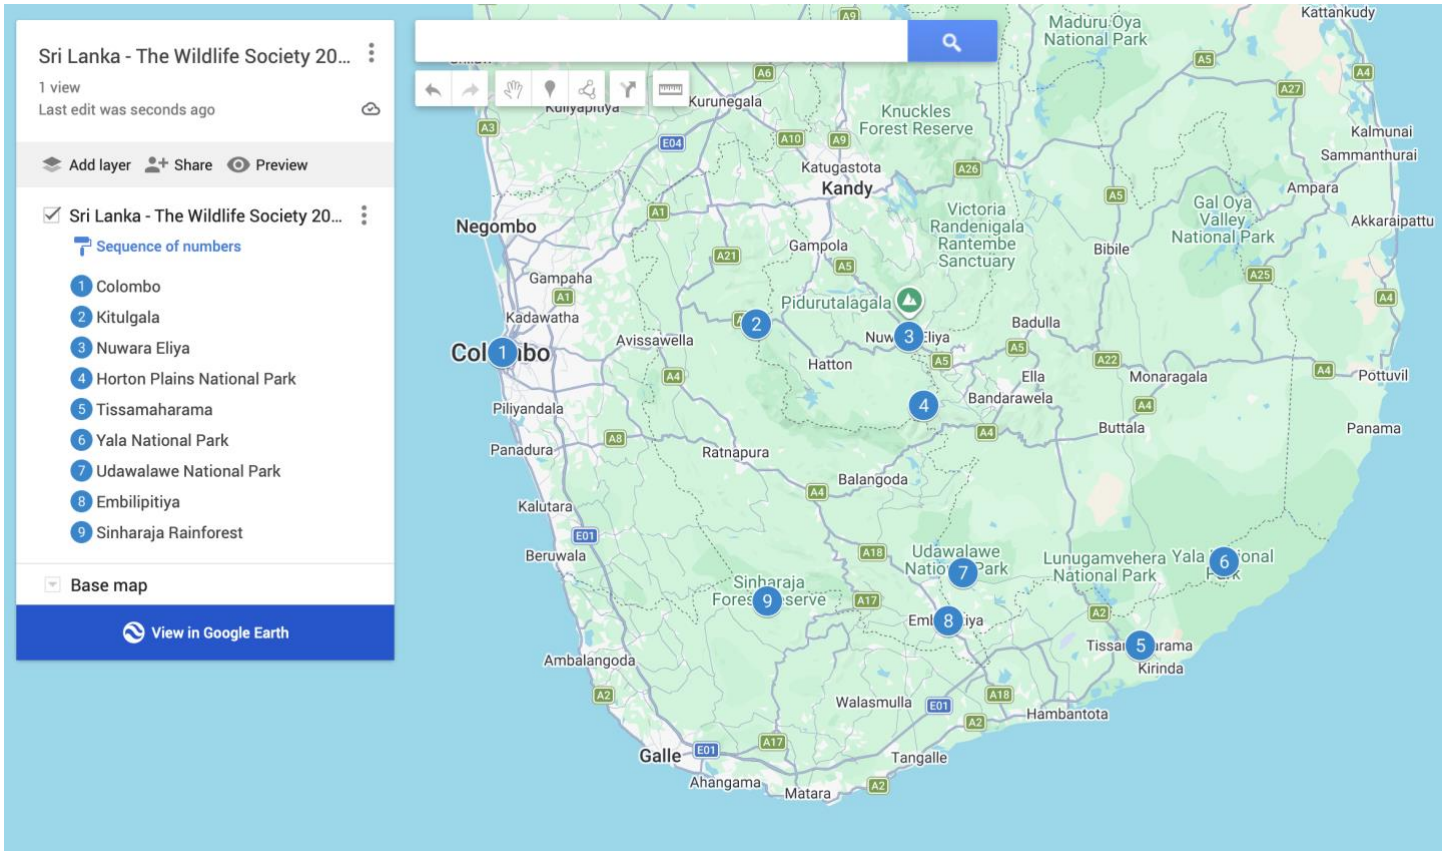
*As an extension to Sri Lanka, participants can continue directly into the **Ranthambore Challenge**, an exciting conservation-focused journey through some of northern India's most celebrated wildlife and cultural*

destinations. The route includes Ranthambore National Park, where spectacular dry deciduous forests, lakes, and rocky escarpments support a wealth of birds and mammals, including the iconic Tiger; Bharatpur and Keoladeo National Park, one of India's legendary wetland birding destinations; and Agra, where we will visit the magnificent Taj Mahal. Along the way, we will seek a superb selection of northern Indian birds while supporting conservation efforts for the Endangered Indian Skimmer, making this a particularly meaningful complement to our Sri Lankan adventure.

Itinerary & Map

Sri Lanka: Endemic Birds and Wildlife

Day 1	**Arrival in Colombo, transfer to Kitulgala**
Day 2	**Kitulgala Rainforest**
Day 3	**Kitulgala to Nuwara Eliya**
Day 4	**Nuwara Eliya & Horton Plains**
Day 5	**Nuwara Eliya to Yala via Tissamaharama**
Day 6	**Yala National Park**
Day 7	**Yala to Uda Walawe NP via Bundala NP**
Day 8	**Explore Uda Walawe NP**
Day 9	**Embilipitiya to Sinharaja Rainforest**
Days 10 & 11	**Sinharaja Rainforest**
Day 12	**Sinharaja to Colombo, final departure**



Birding sites in detail

Colombo to Kitulgala. We depart Colombo and travel through local towns and rubber plantations to the Kitulgala. Occasional stops en route could produce White-throated Kingfisher, Indian Swiftlet, Blue-tailed Bee-eater, Greater Coucal, Crested Serpent Eagle, and Indian Pond Heron.

Black-naped Monarch by Daniel Danckwerts

Kelani River. The scenic and peaceful Kelani River is the location where the classic film, 'Bridge over the River Kwai' was filmed. The gardens of our lodge contain several interesting birds including Green Imperial Pigeon, flocks of Sri Lanka Hanging Parrots feeding in the flowering trees, Yellow-fronted Barbet, the impressive Stork-billed Kingfisher, White-rumped Munia, Orange Minivet, Golden-fronted Leafbird, Yellow-billed Babbler, Oriental Magpie Robin, Purple-rumped and Loten's Sunbirds, Pale-billed Flowerpecker and Square-tailed Bulbul.

Kitulgala Rainforest. We will cross the Kelani River in dugout canoes and spend time walking in the surrounding lowland tropical rainforest in search of the diurnal Chestnut-backed Owlet, Sri Lanka Junglefowl, Sri Lanka Grey Hornbill, Alexandrine, and Layard's Parakeets, the shy, Green-billed Coucal, Brown-capped and noisy flocks of Orange-billed Babblers, Brown-breasted Flycatcher, Legge's Flowerpecker and Spot-winged Thrush. The stunning Sri Lanka Blue Magpie gives itself away by its striking call and may be found feeding at eye-level, sometimes allowing very close approach and excellent photographic opportunities. Other scarce inhabitants include Sri Lanka Spurfowl and Red-faced Malkoha, but we will count ourselves lucky to see either of these two species here.

Indian Pitta by Daniel Danckwerts

Brahminy Kite, Crested Honey Buzzard, Crested Serpent Eagle and Black Eagle may be viewed soaring over the surrounding forest, while large numbers of swifts can sometimes be seen skimming the river. These include Indian Swiftlet, Asian Palm Swift and the huge Brown-backed Needletail. The enigmatic Serendib Scops Owl,

discovered as recently as 2004, also occurs here, and we will try hard to find this elusive endemic. The near-endemic and highly elusive Sri Lanka Bay Owl also occurs in the forest-proper and we might be this rarity during our time in the area if we are extremely fortunate.

Sri Lanka Grey Hornbill by Daniel Danckwerts

Kitulgala area. We'll also bird the more open, secondary forest where the birding is easier and more rewarding than the forest interior. Although a few of the rarer and more secretive species are absent from the open, secondary forest, the habitat does support most of the area's specialties and endemics and the birds that do occur here do so in much higher densities than in the forest interior. In this habitat we'll keep a lookout for noteworthy species such as Southern and Sri Lanka Hill Mynas, Sri Lanka Grey Hornbill, Sri Lanka Green Pigeon, the low-density Crimson-fronted Barbet, wintering Indian Pitta, Black-headed Cuckooshrike, Yellow-browed and Black-capped Bulbuls, Plum-faced Parakeet, Black-hooded Oriole, and Tickell's Blue Flycatcher. Crested Goshawk, Shikra and Banded Bay Cuckoo are also often seen here and there's even a chance of finding one of the island's rarer species such as White-faced Starling, Black-backed Dwarf Kingfisher, the quite distinctive and endemic subspecies of Common Hawk-Cuckoo or Slaty-legged Crake.

Nuwara Eliya. The small town is located in the cooler highlands of central Sri Lanka. We'll bird various sites in the vicinity where a selection of localised endemics, restricted to these higher elevations, can be found. Targets include the extremely low-density Legge's Hawk-Eagle soaring overhead, mixed species flocks with Sri Lanka White-eye, Velvet-fronted Nuthatch, Green and Large-billed Leaf Warblers, Orange Minivet, Yellow-eared Bulbul, Dull-blue Flycatcher, Cinereous Tit and Grey-headed Canary-flycatcher and the skulking Sri Lanka Bush Warbler in the undergrowth. We will also spend time at a Sri Lanka Whistling Thrush site, where a late afternoon/dusk vigil will hopefully produce a sighting of this rare and secretive endemic.

Pied Thrush by Daniel Danckwerts

Horton Plains. The stunning Horton Plains National Park is a good site for endangered and secretive Sri Lanka Whistling Thrush. This highly prized endemic, which inhabits the fringes of high-altitude forested pools, is tricky to pin down and we will be happy with any

sighting of this enigmatic species. Other exciting specialities of this stunted and twisted forest include Sri Lanka Wood Pigeon, Crimson-backed Flameback, Indian Blackbird, the reclusive Sri Lanka Bush Warbler, the stunning and localised Kashmir Flycatcher, here at its winter quarters and often associating with mixed flocks, the endemic Dull-blue Flycatcher, Sri Lanka White-eye, the flashy Indian Blue Robin, Sri Lanka Scimitar Babbler, the stunning Yellow-eared Bulbul and possibly Legge's Hawk-Eagle. In the grassland areas we'll likely encounter the near-endemic Hill Swallow, as well as Pied Bush Chat and flocks of munias that could include Tricolored, White-rumped and the rare and range-restricted Black-throated.

Sri Lanka Whistling Thrush by Daniel Danckwerts

Victoria Park. Here we will search the gardens and thickets along a stream for the secretive Indian Pitta and shy Pied Thrush, both on their wintering grounds. Other noteworthy specials include Forest Wagtail, Greenish Warbler, Velvet-fronted Nuthatch, Kashmir Flycatcher and if we are very lucky, the secretive Slaty-legged Crake or endemic Sri Lanka Thrush.

Surrey Bird Sanctuary. We may make a short stop here for Brown Wood Owl if they are still roosting. Other species of interest that we may find here while searching for the owl include Red-backed Flameback, Southern Hill Myna, Yellow-fronted and Brown-headed Barbets, Orange Minivet, Tickell's Blue and Dull-blue Flycatchers, White-browed Bulbul and Sri Lanka Wood Pigeon.

Sri Lanka White-eye by Daniel Danckwerts

Tissamaharama. We'll spend time visiting the wetlands and woodlands surrounding Tissamaharama (Tissa), home to an amazing variety of water-associated birds. We are likely to encounter Spot-billed Pelican, Little and Indian Cormorants, Oriental Darter - often seen sunning itself on dead snags, Painted Stork, Asian Openbill, Black-headed Ibis, Yellow Bittern in the thick reeds, Lesser Whistling Duck, the spectacular Pheasant-tailed Jacana in open areas of lily-covered

wetland, and, if we are fortunate, the endangered Lesser Adjutant, Cotton Pygmy Goose, Greater Flamingo or the secretive Black Bittern. We'll also visit several potential day roosts for various owl species that could include the impressive Brown Fish Owl, Indian Scops Owl, miniscule Jungle Owlet and Eastern Barn Owl. In the late afternoon we'll stake out an area of coconut palms where we hope to find a pair of the scarce White-naped Woodpecker.

Black-capped Bulbul by Daniel Danckwerts

Yala National Park. We will board open safari jeeps for a day of game viewing and birding in the fabulous Yala National Park. This wonderful reserve supports superb mammals, including healthy numbers of Asian Elephant, Water Buffalo, Sambar, Spotted Deer, sounders of Wild Boar, Golden Jackal, Stripe-necked and Ruddy Mongoose, Tufted Grey Langur, Toque Macaque, Indian Hare and even Leopard! In fact, Yala claims the highest density of Leopard of any site in the world and is one of the very best places in Asia to see this elusive feline. If we are extremely fortunate, we may even encounter a Sloth Bear, which is encountered occasionally in the reserve.

Birding the woodlands of Yala should prove rewarding and we will search for the rare White-naped Woodpecker, the unobtrusive Sirkeer and Blue-faced Malkohas, Yellow-crowned Woodpecker, Jerdon's Bush Lark, White-browed Bulbul, Marshall's Iora, Black-headed Cuckooshrike, Barred Buttonquail, White-browed Fantail, Jerdon's Leafbird, Indian Paradise Flycatcher, Blyth's Pipit and Streaked Weaver. Other interesting species we'll likely encounter include the handsome Brahminy Starling, Sri Lanka Junglefowl, Orange-breasted Green Pigeon, Chestnut-headed, Blue-tailed and Asian Green Bee-eaters, Grey-bellied and Jacobin Cuckoos, Yellow-wattled Lapwing, Yellow-eyed Babbler and Baya Weaver. Indian Peafowl are common in the park, and we'll almost certainly find several males in full display, one of nature's greatest and most spectacular events!

Asian Elephant by Adam Riley

Wetlands and coastal areas literally teem with birds, including the oversized Great Stone-curlew, Little Ringed, Kentish and Pacific Golden Plovers, a variety of other migratory waders, Painted Stork, Lesser Adjutant and the incomparable but scarce and erratic, Black-necked Stork.

Bundala National Park. This area contains extensive coastal wetlands and saltpans, giving us a chance for more coastal species such as the impressive, White-bellied Sea Eagle, Eurasian Whimbrel, Curlew Sandpiper, congregations of Black-tailed Godwit, Little Stint, the uncommon Small and Oriental Pratincoles, Caspian, Greater Crested, Lesser Crested, Little, White-winged, Whiskered and Gull-billed Terns. Scarcer waders include Great Knot, Broad-billed Sandpiper, Common Ringed Plover, and both Red-necked and Temminck's Stints. Scanning carefully around the numerous pans and reedbeds in this area may produce Black, Cinnamon and Yellow Bitterns, Yellow-wattled Lapwing, Watercock, Pin-tailed and Greater Painted-snipe, while wintering Blyth's Pipit may be found in open fields of shorter grass and Indian Stone-curlews are often located roosting under dense, scrubby bushes.

Green-billed Coucal by Glen Valentine

Uda Walawe National Park. This extensive reserve of open grassland and scattered woodland is home to over three-hundred Asian Elephants and some scarce bird species, including the impressive and localised Malabar Pied Hornbill, near-endemic Blue-faced Malkoha, Sirkeer Malkoha and Grey-headed Fish Eagle. Barred Buttonquail sometimes makes an appearance at the road-edge, and we also hope to find Jungle, Ashy and Grey-breasted Prinias, flocks of migratory Rosy Starling, Changeable Hawk-Eagle, and the spectacular Indian Roller. This is also the best area in Sri Lanka to observe the uncommon Jungle Cat!

Sri Lanka Blue Magpie by Daniel Danckwerts

Sinharaja Rainforest. The Sinharaja Rainforest area was selectively logged historically but has recovered well since its protection. It is now the largest area of lowland rainforest in all of Sri Lanka and a UNESCO World Heritage Site. The birding around our lodge consists of forest edge and secondary scrub, which can be excellent at times. Noteworthy species we might encounter include Layard's and Plum-headed Parakeets, Yellow-fronted and Crimson-fronted Barbets, Crested Treeswift, Sri Lanka Hill and Southern Hill Mynas, Indian Paradise Flycatcher, Orange Minivet, Red-backed Flameback,

Yellow-fronted Barbet by Daniel Danckwerts

Sri Lanka Swallow, Asian Brown Flycatcher, Scaly-breasted, White-rumped and the rare and elusive Black-throated Munias, Sri Lanka Hanging Parrot, Sri Lanka Scimitar Babbler, Brown-capped Pygmy Woodpecker, White-browed, Square-tailed and Yellow-browed Bulbuls, Sri Lanka Green Pigeon and the scarce and endemic Green-billed Coucal.

We'll spend time inside the park itself looking for Brown-capped, Dark-fronted and Orange-billed Babblers, the very secretive Sri Lanka Spurfowl – usually tracked down by its call, Layard's Parakeet screeching overhead, the migratory Chestnut-winged Cuckoo, Green-billed Coucal, Large-billed Leaf Warbler, the scarce Red-faced Malkoha, striking Malabar Trogon – often perched motionless high overhead, Spot-winged and shy Sri Lanka Thrushes and flocks of Ashy-headed Laughingthrush.

Forest clearings will afford us views of the canopy and it is here where we will scan for the scarce and very localised White-faced Starling, while watching the forest fringes we will keep our eyes peeled for Sri Lanka Hill Myna, the magnificent Sri Lanka Blue Magpie, Sri Lanka Drongo, Sri Lanka Scimitar Babbler, Legge's Flowerpecker, Brown-backed Needletail flying overhead and Black-capped Bulbul. Possible mammals include Grizzled Giant Squirrel, Purple-faced Leaf Monkey and Layard's Striped Squirrel.

Sinharaja is also home to a colourful variety of butterflies as well as a fine selection of vividly patterned frogs, lizards, and snakes – we may even be lucky enough to encounter Hump-nosed Pit Viper or Indian Rock Python!

Night walks are strictly prohibited inside the park, but we'll try to find the endemic Serendib Scops Owl, rare and elusive Spot-bellied Eagle-Owl and Sri Lanka Bay Owl, as well as Sri Lanka Frogmouth outside the reserve. Our local guides are quite amazing at finding day roosts for these species, and we may not even need to venture out at night if we're lucky!

Sri Lanka Spurfowl (male) by Daniel Danckwerts

Tour Grading & Key

Overall Ease		Mostly undemanding. Suitable for all birding & wildlife interest levels. Comfortable tour for the reasonably fit. A few very early mornings & long days. Optional owling.
Birding Ease		Moderate to easy. Most species provide good visuals in open conditions. A few trickier/skulking species. Not unusual to record all endemics on a single tour.
Accommodation		Comfortable.
Walking / Trails		Mostly easy walks on flat ground (roads or wide trails). A few narrow trails with the odd steep section that can be muddy or slippery.
Vehicles / Roads		Good quality asphalt roads between most towns. Several roads to parks/small villages can be rough gravel or heavily potholed. A few long drives broken up by regular stops.
Photography		Good. No dedicated hides, ad hoc feeders.
Annoyances		Food is typically very spicy, though not always spicy hot. Good vegetarian options. Lowland areas have high humidity. Small chance for land leeches.

Financial Arrangements and Important Notes

The price for this 12-day tailor-made tour of Sri Lanka is **US$4,695.00** per person based on twin/shared accommodation throughout, based on a minimum group size of seven guests.

Single supplement: US$870.00

Tour inclusions:

- All meals from dinner on day 1 to lunch on day 12 of the Sri Lanka Main tour;
- Selected drinks at mealtimes, on a fair usage basis;
- All lodgings;
- All ground transportation during the tour;
- All reserve entrance fees;
- All guiding services;
- US$300 donation to The Wildlife Society for every booking received on the main Sri Lanka tour;
- Tips for local guides, drivers and services.

Tour exclusions:

- Visa fees;
- ANY flights;
- Mini-bar charges at hotels;
- Optional excursions;

- Special gratuities;
- Telephone calls, laundry and other items of a personal nature.

Single Supplement: The single supplement cost for this tour will be charged if you wish to have single accommodation. If RBL cannot provide you with a rooming partner for these nights although you choose to share, the single supplement will become applicable. We will make all reasonable efforts to ensure that a rooming partner is found if you do wish to share.

Tipping: As noted above, gratuities (drivers, hotel staff, restaurants etc.) are included on this tour. However, this does NOT include your Rockjumper leader/s. If you feel that they have given you excellent service, it is entirely appropriate to tip them at your discretion.

Complimentary Membership to The Wildlife Society

As part of this special India and Sri Lanka tour, guests will receive a complimentary one-year membership to **The Wildlife Society (TWS)**, an international organization dedicated to advancing wildlife science, management and conservation.

Membership benefits may include access to wildlife publications and resources, professional networks and working groups, career-development opportunities, and discounts on selected events and products.

By accepting this benefit, you consent to Rockjumper Birding Tours sharing the personal information required to register and administer your membership with The Wildlife Society. This may include your name, email address, country of residence and other necessary registration details.

- **Due to constantly fluctuating exchange rates, we quote our tours in 4 currencies. The tour price is fixed only in the currency printed in bold, and the actual cost in the other currencies listed will be adjusted according to prevailing exchange rates at the time of final invoicing. The same applies to approximate flight and single supplement rates.**
- **Rates are based upon group tariffs; if the tour does not have sufficient registrations, a small group supplement will be offered to confirm the tour.**
- **Tour prices are subject to unforeseen increases in tour related costs and may have to be adjusted as a result.**
- **The designated tour leader/s may be changed at short due to unforeseen circumstances.**
- **The itinerary is indicative only. Changes may need to be made to the order in which the tour is conducted, or some of the venues we visit closer to departure. We will attempt to adhere as close to the original program as possible.**

- It is important for the comfort of your fellow travellers that you do not over-pack. Kindly stick to 20 kg (44 lb) for check in luggage and 8 kg (18 lb) for hand luggage.
- In certain areas that contain potentially dangerous animals, you are confined to the vehicle and are, quite understandably, not allowed to exit.
- This tour does not require a high level of fitness, but participants should be reasonably fit and in good general health as most of the birding will be done on foot and may require walking for several hours at a time. Should you have any physical limitations or medical conditions, please notify us in advance of departure. For much of this tour, we will be well away from modern medical facilities.

Arrival and Departure Details

The main tour begins in Colombo on Day 1. You are kindly required to arrive before midday for the transfer from Colombo to Kitulgala. The main tour ends at Colombo International Airport by mid-afternoon on day 12.

The above information in respect of arrivals and departures is a guide only. Precise arrival and departure information will be sent to you in your Tour Confirmation package once the tour has been officially confirmed. If you wish to arrive early and/or depart late and would like assistance in this regard, kindly contact the Rockjumper office.

Colombo International Airport (IATA: CMB) is the main port of entry and departure for international flights into and out of Sri Lanka.

Indira Gandhi International Airport (IATA: DEL) is the main port of entry and departure for international flights into and out of India, for those interested in the Ranthambore Challenge.

Visa requirements differ by country, nationality of the traveller and duration and purpose of your intended stay. It may be necessary to obtain a visa or an electronic travel authorization in advance of your travel. It is therefore vitally important that you check with your travel agent/consulate/embassy for exact visa requirements.

DO NOT book any flights until the Rockjumper Team have officially confirmed the tour.
