Kenya & Tanzania

Birds & Big Game

Plains Zebras by Rob Williams

Few places on Earth stir the imagination quite like East Africa. Vast golden savannas stretching to the horizon, snow-capped mountains rising above elephant-filled plains, endless herds of wildebeest and zebra, and some of the most spectacular birdlife on the planet combine to create the quintessential African safari experience.

This unforgettable journey explores the very best of Kenya and Tanzania, from the elephant-rich woodlands of Tarangire and the wildlife-packed floor of the Ngorongoro Crater to the legendary Serengeti, where immense herds roam beneath vast African skies. We continue north into Kenya to experience the shadow of Mount Kilimanjaro in Amboseli, the forests of Mount Kenya, and the arid wilds of Samburu, home to a remarkable suite of birds and mammals found nowhere else.

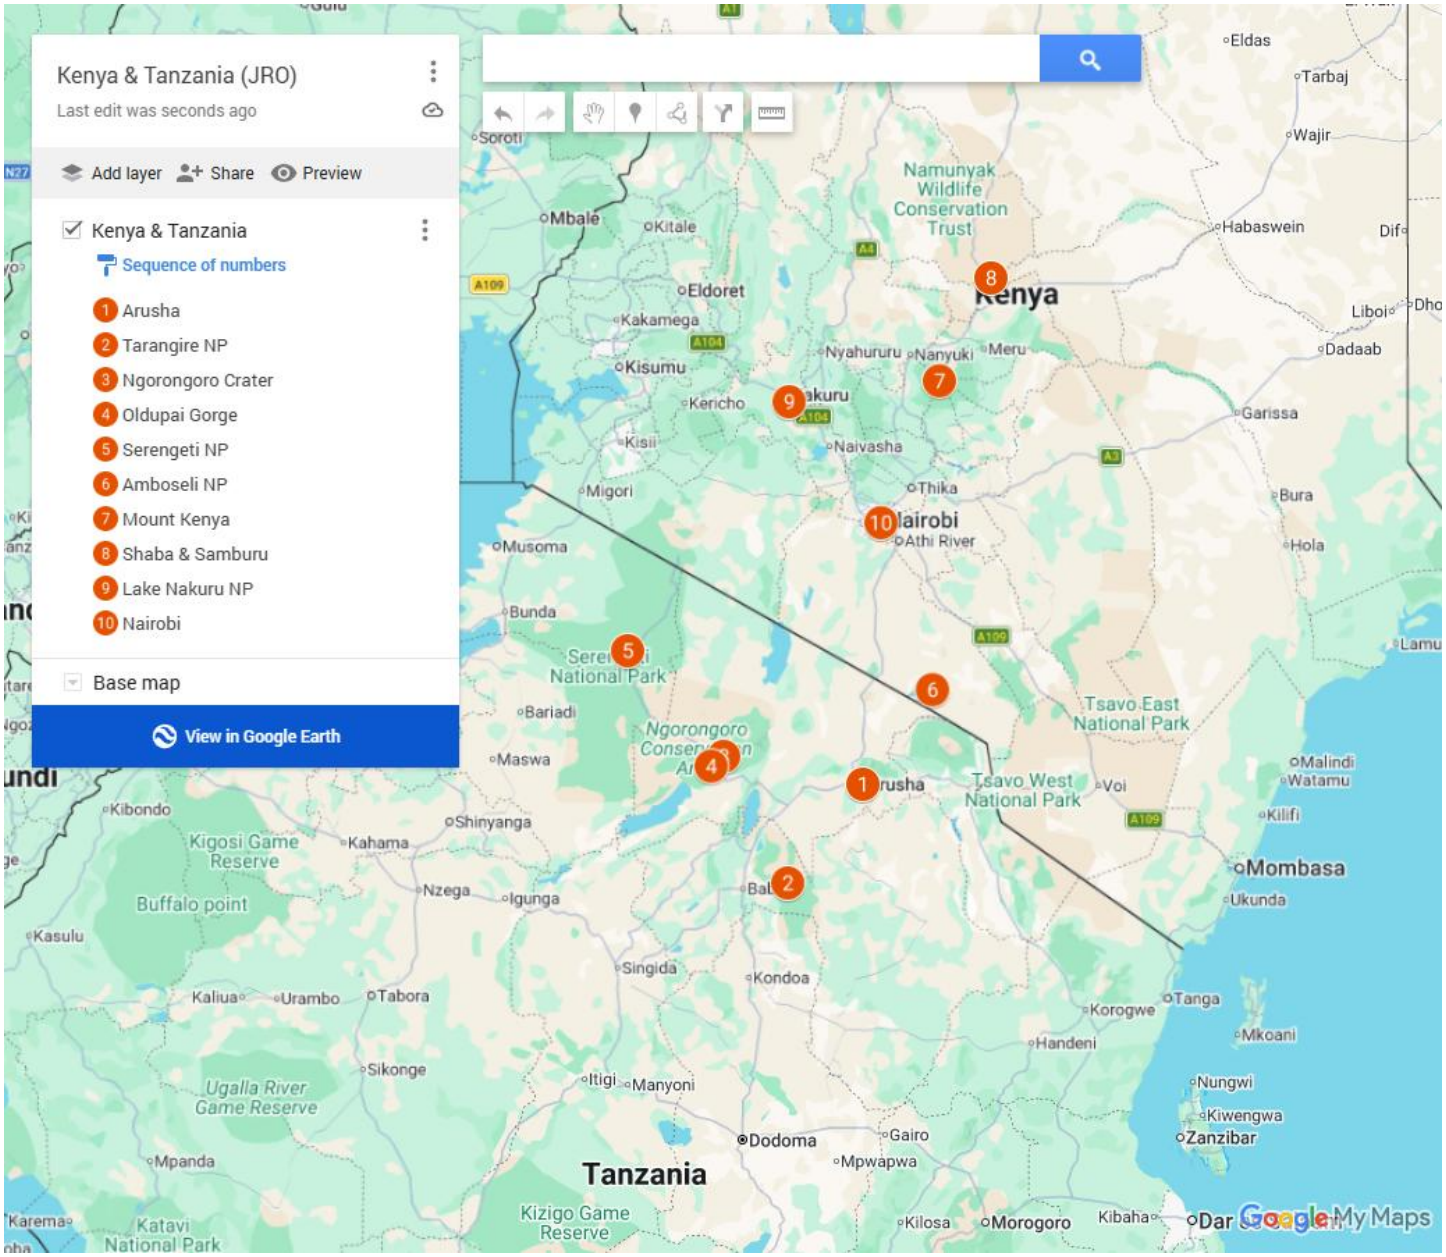

Alongside East Africa's legendary mammals, we will seek out some of the continent's most charismatic birds. Secretarybirds stalk the grasslands, Southern Ground Hornbills stride purposefully across the savanna, Kori Bustards command the plains, and brilliant Superb Starlings and lovebirds illuminate the acacia woodlands. Wetlands host flamingos, cranes and storks, while the arid bush country produces a dazzling cast of dry-country specialists, including the unforgettable Vulturine Guineafowl and Golden-breasted Starling.

Designed to maximize both birding and wildlife viewing, this tour combines world-class safari destinations, comfortable accommodations and expertly guided exploration. From elephant herds beneath Kilimanjaro and predators on the Serengeti plains to Secretarybirds, Southern Ground Hornbills and brilliant Superb Starlings, every day promises memorable encounters in one of the world's great natural theatres.

Join us for an extraordinary adventure through the heart of East Africa, where spectacular birds, iconic mammals and breathtaking landscapes combine to create a safari experience unlike any other.

Itinerary & Map

Day 1	**Arrival in Arusha**
Day 2	**Arusha to Tarangire National Park**
Day 3	**Tarangire National Park**
Day 4	**Tarangire National Park to Ngorongoro Crater**
Day 5	**Ngorongoro Crater**
Day 6	**Ngorongoro Crater to the Serengeti National Park via Oldupai Gorge**
Days 7 & 8	**Serengeti National Park**
Day 9	**Serengeti National Park to Arusha**
Day 10	**Arusha to Amboseli National Park**
Day 11	**Amboseli National Park**
Day 12	**Amboseli National Park to Mt. Kenya**
Day 13	**Mt. Kenya**
Day 14	**Mt. Kenya to Shaba National Reserve**
Days 15 & 16	**Shaba and Buffalo Springs National Reserves**
Day 17	**Shaba National Reserve to Lake Nakuru National Park**
Day 18	**Lake Nakuru National Park to Nairobi and depart**

Birding sites in detail

Superb Starling by Adam Riley

Tarangire National Park. The Tarangire ecosystem is the third largest in Tanzania, sprawling over a vast 20 000km² (over 7 700 miles²). Seasonally, the park supports the second-largest concentration of wildlife in Tanzania, surpassed only by the Serengeti during peak migration! However, Tarangire is most famous for its huge numbers of African Savanna Elephant that congregate along the meandering Tarangire River. We will take time to observe these massive pachyderms and will be amazed at their tender family interactions. Other mammals likely to be seen include the stately (Common) Waterbuck, Impala, comical Common Warthog and Maasai Giraffe.

The acacia woodlands and baobab-studded grasslands also provide a home for a large number of birds, with the park total exceeding 500 species! During our time here we have the opportunity to find African Hawk-Eagle, the diminutive Pygmy Falcon, Double-banded Courser, Red-necked and Yellow-necked Spurfowls, Black-faced Sandgrouse, White-bellied Bustard, Meyer's and Red-bellied Parrots, Bare-faced Go-away-bird, Red-and-yellow and D'Arnaud's Barbets, Mottled Spinetail, Spotted Palm Thrush, Banded Parisoma, flocks of Northern Pied Babbler and delightful Red-cheeked and Blue-capped Cordon-bleus. Two major targets for the area are the Tanzanian endemic Ashy Starling and East African endemic, Yellow-collared Lovebird. We will also visit the vast Silale Swamp which is excellent for waterfowl. Species to look out for here will be African Openbill, Goliath Heron, Southern Pochard, Fulvous Whistling Duck, African Jacana and Long-toed Lapwing. If we are fortunate, we may spot a Black Coucal or flush out a secretive African Crake!

Night birding around our lodge can be fruitful for Slender-tailed and Freckled Nightjars and the diminutive African Scops Owl.

Ngorongoro Crater Conservancy. The vast Ngorongoro Conservation Area covering 8 300km2 (3 200miles2) is a World Heritage Site that protects Earth's largest intact volcanic caldera (260km2 / 100miles2) and one of the world's most scenically breath-taking natural areas. What's more, the crater is also home to one of the planet's densest populations of large mammals.

Yellow-collared Lovebird by Paul Josop

The fabulous forests that cloak the rim of this iconic site are home to a feast of Afro-

Ngorongoro Crater vista by Rob Williams

montane forest species such as Hildebrandt's Francolin, Schalow's Turaco, the elusive Brown-backed Woodpecker, beautiful Cinnamon-chested Bee-eater, Mountain Greenbul, Brown-headed Apalis, Brown Parisoma, skulking Cinnamon Bracken Warbler, Dusky and White-eyed Slaty Flycatchers, busy flocks of Broad-ringed White-eyes and dazzling Tacazze, Golden-winged and Eastern Double-collared Sunbirds, Baglafecht Weaver and Streaky Seedeater.
The drive down to the Ngorongoro crater floor (600m / 1,970ft) is excellent for birding, and we will keep our eyes peeled for Variable Sunbird, Singing, Hunter's and the localized but dapper Lynes's Cisticolas, Cinnamon-breasted Bunting, Yellow-crowned Canary and Southern Citril.

The crater is deluxe 'Big Five' territory and a photographer's dream. Most of the animals are extremely relaxed and habituated to the presence of human admirers and the high crater walls, usually cloaked in a pure white frosting of clouds, make for dramatic back-drops to animal photography. In addition, the crater floor provides a mini-example of a complete African ecosystem with forests, lakes, grasslands, swamps and rivers. Between 25,000 and 30,000 large animals reside in the crater and great concentrations of Blue Wildebeest and Plains Zebra are supplemented by smaller numbers of African Savanna Elephant (we hope to find some of the crater's famous Tuskers), African Buffalo, the highly endangered Black Rhinoceros, Common Hippopotamus, Eland and both Thomson's and Grant's Gazelles. The crater supports exceptionally high densities of predators, including Lion, Cheetah, Leopard, Serval, African Golden Wolf, Black-backed Jackal, Bat-eared Fox and Spotted Hyena.

The birding is equally rewarding and we can expect to find many of the picture-book species that make Africa so famous. Pink rafts of Greater and Lesser Flamingos on Lake Magadi, Common Ostrich striding over the grasslands, regal Kori Bustard (the world's heaviest flying bird), Saddle-billed and Yellow-billed Storks, the elegant Grey Crowned Crane

Tacazze Sunbird by Wade Lee

Cheetah by Rob Williams

and good numbers of raptors including the unique Secretarybird, Bateleur, Martial Eagle, Black-chested Snake Eagle and Augur Buzzard could all be found. Amongst the many other species that we may encounter, we hope to see the uncommon Shelley's Francolin, Black-bellied Bustard, Dusky Turtle Dove, White-headed Barbet, Pectoral-patch Cisticola, comical Anteater Chat, Black-crowned Tchagra, Orange-breasted Bushshrike, attractive and melodious Grey-capped Warbler, Yellow Bishop, the range-restricted Rufous-tailed Weaver, beautiful Rosy-throated Longclaw and the East African endemic Pangani Longclaw, Fan-tailed Widowbird and the skittish Quailfinch, the latter probably more easily seen here than anywhere else!

At dusk we will attempt to track down Montane Nightjar.

Oldupai Gorge. As we approach Oldupai Gorge, we pass through an area that is home to the Maasai people. The Maasai are among East Africa's most iconic pastoralist peoples, renowned for their rich cultural traditions and deep connection to these landscapes. Here, we have the opportunity for an optional (non-inclusive) excursion to a traditional Maasai village. A local guide will explain their unique culture as you watch the people busy about their daily chores. You will also be treated to a display of the famous Maasai dancing and will have excellent photographic opportunities.

Our lunch venue will be the well-known Oldupai Gorge, so named after the wild Sisal plant that grows there. As a result of massive geological activities over the eons, Oldupai provides a unique record of countless years of fossilized creatures and plants in a series of stratified rock-layers. Most famous of all discoveries, which revolutionized thinking on hominid evolution, have been those of Australopithecine hominid remains found by the Leakey family. We will have time to explore the very informative museum at the site that exhibits replicas of the hominid fossils and extinct animals that used to inhabit the region, ranging from River Elephant and Giant Swine to Short-necked Giraffe!

Black Rhinoceros by Andre Bernon

A bird walk around the site may yield arid-country species such as Slate-colored Boubou, Red-fronted

Secretarybird by Adam Riley

Tinkerbird, Rufous Chatterer, Kenya Sparrow, Vitelline Masked Weaver, White-bellied Canary, Southern Grosbeak-Canary and the beautiful Purple Grenadier.

Serengeti National Park. Extending for an incredible 15 000km2 (5 790miles2), the Serengeti is one of the world's largest natural sanctuaries. Despite its vast size, the numbers of game animals that we can expect to see are truly astounding. The Serengeti, derived from the Maa word 'siringet', meaning 'endless plains', consists mostly of grasslands interspersed with acacia woodlands and rocky outcrops. There is little permanent water in the park and this fact, combined with a fairly regular rainfall pattern, has resulted in the world-famous Wildebeest migration, when up to two million large ungulates move between the Serengeti in Tanzania and Maasai Mara in Kenya. Our visit is timed so that we might bear witness to unbelievable numbers of wildebeest, zebra and antelope, an unrivalled and primeval wonder of the natural world!

During our visit to the Serengeti we will explore the southern and central areas. Once again, we have the chance of finding the full complement of African mega fauna. We hope to see lazing prides of Lion, Leopard draped over large trees, aloof Cheetah resting on or near vantage points, skulking Spotted Hyena, Black-backed Jackal and, if we are fortunate, the bizarre Bat-eared Fox. Several species of smaller cats such as Caracal, Serval or Afro-Asiatic Wildcat may also be seen. Besides the wildebeest, the Serengeti supports huge populations of Plains Zebra, African Buffalo, Maasai Giraffe, Common Warthog, Thomson's and Grant's Gazelles, Impala, Tsessebe, Hartebeest, Bohor Reedbuck, Eland and smaller numbers of African Savanna Elephant, Common Hippopotamus, rubber-nosed Kirk's Dik-dik, Oribi and (Defassa) Waterbuck.

Mt. Kilimanjaro as seen from Amboseli NP by Glen Valentine

Additionally, there will certainly be a veritable feast of superb birds to keep us very busy for our time spent exploring the park. Star birds include

Serval by Julian Parsons

Grey-crested Helmetshrike, Red-throated Tit, the stunning Steel-blue Whydah and the highly localised Karamoja Apalis. Other specials are Grey-breasted Spurfowl, Fischer's Lovebird, Rufous-tailed Weaver, Usambiro Barbet and Athi Short-toed Lark.

These birds can be found together with a host of other species such as the magnificent Saddle-billed Stork, up to six species of vulture, the grotesque Marabou Stork, stately Secretarybird, Bateleur, Chestnut-bellied and Yellow-throated Sandgrouse, Kori and White-bellied Bustards, coveys of Coqui Francolin, Temminck's Courser, Pearl-spotted Owlet, Red-fronted Barbet, Tanzanian Red-billed Hornbill, the whimsical Southern Ground Hornbill, Abyssinian Scimitarbill, Black-lored Babbler, Taita and Grey-backed Fiscals, Magpie Shrike, Hildebrandt's and splendid Rüppell's Starlings, both species of oxpecker, Silverbird, the cute Buff-bellied Warbler, aptly named Beautiful Sunbird, Red-headed and Speckle-fronted Weavers, Grey-capped Social Weaver, Chestnut Sparrow, Blue-capped Cordon-bleu, Black-faced Waxbill and, if we are fortunate, Grey-headed Silverbill.

Not only is this a great place in which to find game and birds, but the wide green-gold savannas, dotted with thorn trees, also make it ideal for photography. The Serengeti is ravishingly beautiful and offers long, undisturbed views and utterly dramatic panoramas.

Arusha & surrounds. Near Arusha, vast tracts of Acacia woodland hold Red-throated Tit, Eastern Violet-backed Sunbird, Red-faced Crombec, African Penduline Tit, Golden-breasted Bunting, African Grey Flycatcher and Reichenow's Seedeater. The more arid, drier woodland may turn up Chestnut Sparrow, Rosy-patched Bushshrike, Spotted Palm Thrush, Northern Pied Babbler, Pygmy Falcon and Blue-naped Mousebird.

Afro-montane forest habitat in Arusha can produce Silvery-cheeked Hornbill, White-eared Barbet, Stripe-faced & Grey-olive Greenbul, Red-throated Twinspot, Black-throated Wattle-eye, African Emerald Cuckoo, Red-winged and Violet-backed Starlings, Retz's Helmetshrike, African Black Duck, Giant Kingfisher, Taveta Weaver, African Pygmy and Brown-hooded Kingfisher, Pallid Honeyguide, Mountain Oriole, Mbulu White-eye, Red-backed Mannikin, shy Rüppell's Robin-Chat and, with a little luck, Mountain Wagtail along the stream.

Gerenuk by Glen Valentine

Purple Grenadier by Wade Lee

Mammals we may see here include the white-throated sub-species of Blue Monkey (Zanzibar Syke's), Guereza and Ochre Bush Squirrel.

An optional night walk could produce African Wood Owl and Thick-tailed Greater Galago.

Amboseli National Park. Amboseli National Park lies at the foot of Mount Kilimanjaro, Africa's highest mountain at 5 895m above sea level (almost 20 000ft) and the world's highest freestanding mountain. Kilimanjaro's snow-capped peaks dominate every aspect of this park and form a stunning backdrop to the wildlife here. During our exploration of the park's open plains, swamps and lakes, we will once again have the opportunity to enjoy superb game viewing. Amboseli is particularly well known for its huge population of African Savanna Elephant, which are part of the longest-standing elephant and conservation research program in the world. Possible new mammal species today include the localised Yellow Baboon (as opposed to Olive Baboon that dominates most of East Africa) and, if we are fortunate, Serval.

There is a good combination of arid and moist habitats in Amboseli. Dry-country specials we will look for include Buff-crested Bustard, Pink-breasted Lark, Tiny Cisticola, Mouse-colored Penduline Tit, Rosy-patched Bushshrike, Fischer's Starling and Grey-headed Silverbill. The moist grasslands of the park are good for Hartlaub's Bustard and Pangani Longclaw. We should also find a good selection of waterbirds including numerous waders, Greater Painted-snipe, several ducks and numerous species of herons and storks.

Mount Kenya. The geographical focus of the central highlands is Mount Kenya, the second highest mountain in Africa with a snow-capped peak rising to 5 199m (17 100ft) above sea level. Birding and game viewing from the balcony of our lodge can be spectacular – in fact, the localised Red-fronted Parrot, Eastern Bronze-naped Pigeon, Kenrick's and Sharpe's Starlings, African Buffalo, Northern Bushbuck and African Savanna Elephant can all sometimes be seen while we eat breakfast!

White-headed Wood Hoopoe by Glen Valentine

Once again we will have the opportunity of birding rich forest and forest edge habitats and species we will look for include Crowned Eagle (Africa's version of the Harpy Eagle), Mountain Buzzard, African Goshawk,

Narina Trogon by Adam Riley

African Cuckoo-Hawk, Hartlaub's Turaco (a stunning bird that is particularly common here), beautiful but secretive Narina and Bar-tailed Trogons, querulous flocks of White-headed Wood Hoopoe, impressive Silvery-cheeked Hornbill, Moustached and Yellow-rumped Tinkerbirds, the beautiful Black-throated, Chestnut-throated and Grey Apalises, African Hill Babbler (an accomplished songster), Black-backed Puffback, Mountain Oriole, Olive-breasted, Yellow-whiskered and Slender-billed Greenbuls, Grey Cuckooshrike, Mountain Yellow Warbler, White-tailed Crested Flycatcher, Brown Woodland Warbler, Slender-billed and Waller's Starlings, White-starred Robin, Rüppell's Robin-Chat, Abyssinian Crimsonwing, Kikuyu White-eye, Northern Double-collared Sunbird, Brown-capped Weaver, Thick-billed Seedeater, Black-and-white (Red-backed) Mannikin and, possibly, the shy Oriole Finch.

Mammals are also well represented on the slopes of Mt. Kenya, and we will be looking for Guereza (Eastern Black-and-white Colobus), Blue Monkey (the attractive local race is called Kolb's White-collared Monkey) and Northern Bushbuck. We will quite likely fall asleep tonight to the eerie calls of Montane Nightjar and Southern Tree Hyrax!

Mount Kenya to Shaba. This road passes through montane grasslands and fields where we hope to find Long-tailed, Red-collared and exquisite Jackson's Widowbirds.

Reticulated Giraffe by Julian Parsons

Vulturine Guineafowl by Wade Lee

Shaba and Buffalo Springs National Reserves. Shaba is known as one of the most scenically attractive reserves in Kenya, and together with neighbouring Buffalo Springs boasts a unique collection of game only found in this region, including Reticulated Giraffe, the attractive Grevy's Zebra, Lesser Kudu, giraffe-necked Gerenuk and Beisa Oryx. These reserves consist of rugged mountains, Acacia woodland and inhospitable lava plains dissected by strips of verdant riverine vegetation along the Ewaso Nyiro River, while isolated springs away from the river provide much needed water for the areas' faunal inhabitants.

Golden-breasted Starling by Daniel Danckwerts

Shaba, made famous by the late Joy Adamson and her leopardess Penny, has also gained media attention due to it being used to film parts of the Hollywood movie 'Out of Africa' and the reality show 'Survivor: Africa'. We will be spending nights in both Shaba and Buffalo Springs National Reserves.

Some special birds that we will search for through the desolate, but beautiful semi-desert scrub and riverine vegetation during these two days include Somali Ostrich, the strange and colourful Vulturine Guineafowl, Somali

Marabou Stork & Lesser Flamingo by Julian Parsons

Courser, Lichtenstein's Sandgrouse, White-throated and Somali Bee-eaters, Violet (Grant's) Wood Hoopoe, the localised White-headed Mousebird, Nyanza Swift overhead, Eastern Yellow-billed Hornbill, Greater Honeyguide, Black-throated Barbet, Fan-tailed Raven, Red-winged, Pink-breasted and Williams's Larks, Ashy Cisticola, Brown-tailed Rock Chat, Northern Crombec, Yellow-vented Eremomela, Grey Wren-Warbler, the strange scrub-dwelling Red-fronted Warbler, Rufous Chatterer, Pygmy Batis, Acacia Tit, Northern Puffback, Rosy-patched Bushshrike, the breathtaking Golden-breasted and quirky Bristle-crowned Starlings, Golden Pipit, Black-bellied and Hunter's Sunbirds, Straw-tailed Whydah, Black-capped Social Weaver, White-headed Buffalo Weaver, Donaldson Smith's Sparrow-Weaver, Golden Palm Weaver, Chestnut Weaver, Crimson-rumped Waxbill, African Silverbill, Cut-throat Finch, Parrot-billed Sparrow and Somali Bunting.

Lake Nakuru National Park. Lake Nakuru is renowned for its alkaline lake ecosystem and supports populations of both White and Black Rhinoceros. Flamingo numbers fluctuate considerably according to water levels and food availability, but the lake remains an important refuge for a wide variety of waterbirds. At times, when conditions are favourable, vast congregations of flamingos gather along the shoreline, turning the lake a gorgeous rosy pink. Our lodge offers a unique vantage point overlooking this spectacular scene.

A game drive through the park is likely to produce African Buffalo, Plains Zebra, the glamorous Northern (Rothschild's) Giraffe, several antelope species and Lion and Leopard may be found. Aside from flamingos, other waterbirds abound and we can expect to find both species of African pelicans (Great White usually present in large numbers), cormorants, egrets, herons, ibises, ducks, African Spoonbill, the regal African Fish Eagle and noisy groups of Pied Kingfisher. Other species we may encounter include Coqui and Hildebrandt's Francolins, White-fronted Bee-eater, Green Wood Hoopoe, Red-throated Wryneck, Eastern Grey and Nubian Woodpeckers, Red-rumped and Mosque Swallows, Mocking Cliff Chat, Little Rock Thrush, Arrow-marked Babbler, the scarce Grey-crested Helmetshrike, Rüppell's and Greater Blue-eared Starlings, and Speke's Weaver.

Kinangop Plateau. We make a short stop in the upland grasslands on the Kinangop Plateau to search for the rare endemic, Sharpe's Longclaw.

African Fish Eagle by David Hoddinott

Tour Grading & Key

Overall Ease		Undemanding. Suitable for birders and wildlife enthusiasts of all experience levels. Minimal physical exertion is required.
Birding Ease		Undemanding. Most target species are observed in open habitats and from vehicles, providing generally excellent viewing conditions. Limited forest and forest-edge birding.
Accommodation		Comfortable throughout. Most accommodations are of a high standard, with quality safari lodges and tented camps. One lodge more rustic, reflecting its location.
Walking / Trails		Very little walking required. Most birding and wildlife viewing is conducted from vehicles, with occasional short walks around lodge grounds and designated safe areas.
Vehicles / Roads		Purpose-built safari vehicles with pop-up roofs provide excellent wildlife viewing and photography opportunities. While travel between major centres is generally on sealed roads, game-drive routes and access roads within parks and reserves can be rough, dusty and corrugated, resulting in some bumpy journeys.
Photography		Excellent. Outstanding opportunities for bird, mammal, landscape and safari photography from vehicles and lodge grounds. No dedicated hides.
Annoyances		Conditions can be hot, dry and dusty. Biting insects, including Tsetse flies, may be encountered in some areas.

Financial Arrangements and Important Notes

Tour dates, prices, single supplement, approximate flight costs and tour spaces are displayed on our website.

Tour inclusions:

- All meals from dinner on day 1 to lunch on day 18;
- Bottled drinking water;
- All lodgings;
- All ground transportation during the tour;
- All reserve entrance fees;
- All guiding services
- Tips for local guides, drivers and services.

Tour exclusions:

- Visa fees;
- ANY flights;
- Any beverages (including mini-bar charges at hotels);
- Optional excursion to a traditional Maasai village;
- Optional guided forest walks;
- Special gratuities;
- Telephone calls, laundry and other items of a personal nature.

Single Supplement: The single supplement cost for this tour will be charged if you wish to have single accommodation. If RBL cannot provide you with a rooming partner for these nights although you choose to share, the single supplement will become applicable. We will make all reasonable efforts to ensure that a rooming partner is found if you do wish to share.

Tipping: As noted above, gratuities (drivers, hotel staff, restaurants etc.) are included on this tour. However, this does NOT include your Rockjumper leader/s. If you feel that they have given you excellent service, it is entirely appropriate to tip them at your discretion.

- **Due to constantly fluctuating exchange rates, we quote our tours in 4 currencies. The tour price is fixed only in the currency printed in bold, and the actual cost in the other currencies listed will be adjusted according to prevailing exchange rates at the time of final invoicing. The same applies to approximate flight and single supplement rates.**
- **Rates are based upon group tariffs; if the tour does not have sufficient registrations, a small group supplement will be offered to confirm the tour.**
- **Tour prices are subject to unforeseen increases in tour related costs and may have to be adjusted as a result.**
- **The designated tour leader/s may be changed at short due to unforeseen circumstances.**
- **The itinerary is indicative only. Changes may need to be made to the order in which the tour is conducted, or some of the venues we visit closer to departure. We will attempt to adhere as close to the original program as possible.**

- To ensure your comfort and that of your companions, please limit yourself to one medium-sized suitcase or duffel bag (20 kg / 44 lb) and one carry-on bag, as space in the vehicles is limited. Excess or oversized luggage can make vehicle storage difficult, particularly on full departures.
- Due to the presence of potentially dangerous game, we will be spending much of this tour in vehicles, including birding time.
- Wildlife viewing is often at its best during the cooler hours of the day. Early morning departures will be a regular feature of the tour.
- Conditions can vary considerably throughout the tour. Guests should be prepared for warm, sunny days, cool mornings at higher elevations, and occasional dust on game drives.
- While every effort will be made to maximise wildlife sightings, animal movements are unpredictable and some sought-after species may require patience and persistence to locate.

Arrival and Departure Details

The tour starts with a welcome dinner on the evening of day 1. As this is an arrival day, you are free to arrive at any time. The tour will conclude in the mid to late afternoon of day 18.

The above information in respect of arrivals and departures is a guide only. Precise arrival and departure information will be sent to you in your Tour Confirmation package once the tour has been officially confirmed. If you wish to arrive early and/or depart late and would like assistance in this regard, kindly contact the Rockjumper office.

Kilimanjaro International Airport, Arusha (IATA: JRO) in Tanzania and Nairobi International Airport, Nairobi (IATA: NBO), in Kenya are the main port of entry and exit for this tour. The most reliable and regular routes for North American and European travellers flying out of Kilimanjaro is via Amsterdam (KLM) or Nairobi.

Visa requirements differ by country, nationality of the traveller and duration and purpose of your intended stay. It may be necessary to obtain a visa or an electronic travel authorization in advance of your travel. It is therefore vitally important that you check with your travel agent/consulate/embassy for exact visa requirements.

DO NOT book any flights until the Rockjumper Team have officially confirmed the tour.
