Argentina & Brazil

Iguazú Extension

Birds & Wildlife of the Pantanal & Cerrado

Amazon Rainforest Birding Extension

Toco Toucan by Adam Riley

Brazil, one of the most biodiverse countries on the planet, is a dream destination for general naturalists, photographers, and birders alike. Home to swathes of Amazon Rainforest, the vast majority of the continent's savannah and endemic-rich Atlantic Rainforest, and the highly celebrated Pantanal, few destinations can offer such great variety and abundance in such a short space of time.

Combining a visit to two of these great regions - the Pantanal, weighing in as the world's largest freshwater wetland, and the Cerrado, a true icon of Brazil's fascinating habitats - our main tour packs in an incomparable mix of productive birding, great wildlife-viewing and superb photography opportunities. Indeed, sampling a fantastic cross-section of the Pantanal's 250 000km² (96 500mi²) of woodland, swathing rivers and shallow wetlands, on top of the bird rich Cerrado in the Chapada dos Guimarães area, our 10 day itinerary is simply unbeatable.

Our extension to the incredible Iguazú Falls, offers not only a visit to the most voluminous and arguably most scenic falls in the world, but also several days of fantastic Atlantic rainforest birding. Targets, whenever we're

not marvelling at the falls, include Surucua Trogon, Rufous-capped Motmot, Rufous Gnateater, Spot-backed and Tufted Antshrikes, Slaty-breasted Wood Rail, Black-throated Grosbeak, Red-ruffed Fruitcrow, Spot-billed Toucanet and many more, while our forays to the various fall's viewpoints are likely to turn up sightings of Black-fronted Piping Guan and the iconic Great Dusky Swift! Our itinerary even allows time to venture to higher-elevation birding sites, in search of other regional specialties such as Dusky-tailed Antbird and Chestnut-headed Tanager.

Our Amazon Rainforest Birding Extension takes us to the soon to be famous Thaimacu Lodge. Here we will explore the trails and waterways while also scanning from a productive canopy tower in search of Bald Parrot, Razor-billed Curassow, Zigzag Heron, Cryptic Forest Falcon, Curl-crested Aracari, Rufous-faced and Bare-eyed Antbirds, and Fiery-capped, Flame-crested and Band-tailed Manakins to name just a few of the special species we hope to see!

Itinerary & Map

Iguazú Extension

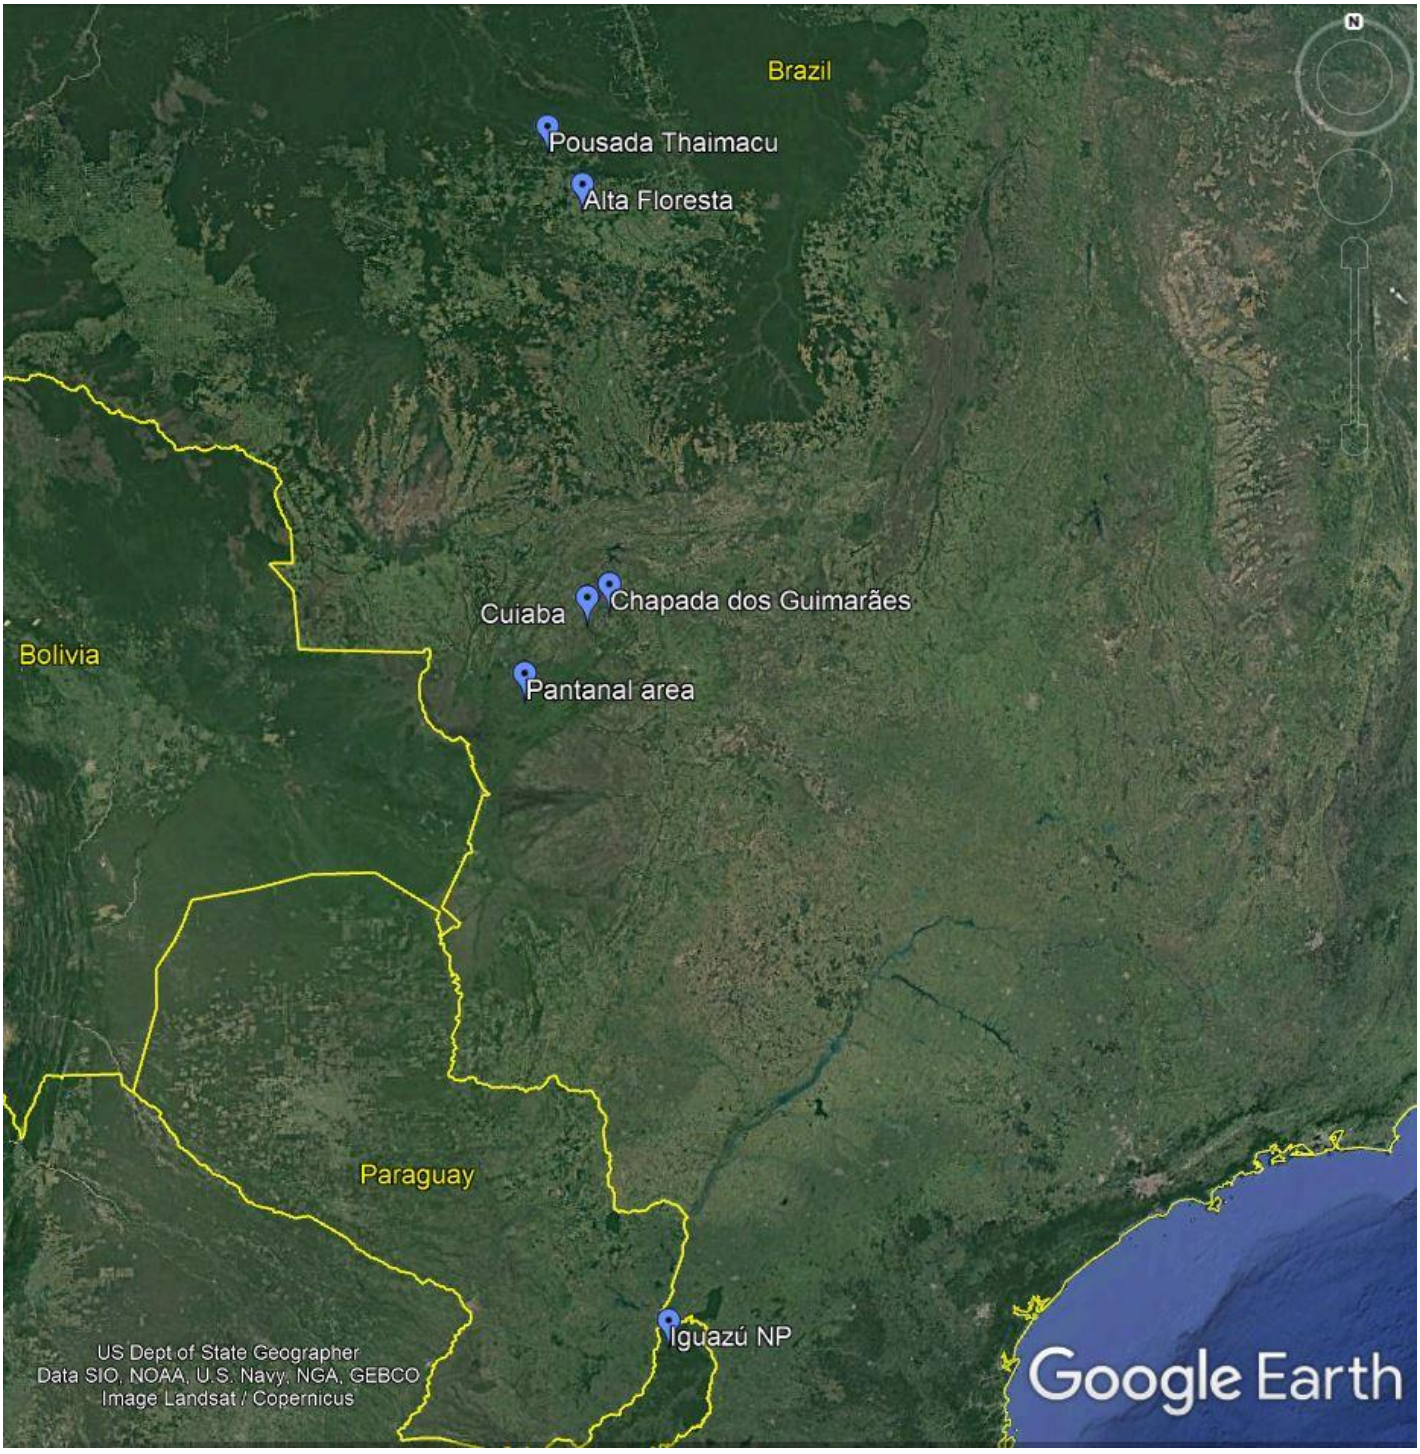

Day 1	**Arrival in Foz do Iguaçu (Brazil), transfer to Iguazú Falls (Argentina)**
Days 2 to 4	**Iguazú Falls & surrounds (Argentina)**
Day 5	**Iguazú Falls to Foz do Iguaçu & final departure**

Birds & Wildlife of the Pantanal & Cerrado

Day 1	**Arrival in Cuiaba, transfer to the Pantanal**
Days 2 to 6	**Pantanal area**
Day 7	**Pantanal area to Chapada dos Guimaraes**
Days 8 & 9	**Chapada dos Guimaraes area**
Day 10	**Chapada dos Guimaraes to Cuiaba & final departure**

Amazon Rainforest Birding Extension

Day 1	**Arrival in Cuiaba, flight to Alta Floresta & transfer to Pousada Thaimacu**
Days 2 to 5	**Pousada Thaimacu**
Day 6	**Pousada Thaimacu to Alta Floresta, flight to Cuiaba & final departure**

Birding sites in detail

Iguazú Falls by Rob Williams

Iguazú National Park. Iguazú National Park protects the vast majority of one of the most important natural forests south of the Amazon: the Interior Atlantic Forest, hosting dozens of unique, often rare, orchids, small primates, bats and birds - many of which are also endemic. Within the park, the Iguazú River plummets 70 meters into a stunning canyon below, in a curtain of cascades spanning more than 250 individual waterfalls and an impressive 2 kilometres! We have 3 full days to enjoy both the falls and the forest within the park to their fullest, by strolling a good selection of the park's myriad of trails and walkways, and by paying a visit to several spectacularly perched lookouts along the way.

Black-fronted Piping Guan by Lev Frid

The walkways have been built at several different levels, allowing visitors a chance to see the falls from both above and below. A narrow-gauge train also allows visitors to access several different areas, most notably the most spectacular fall of them all – the Devil's Throat, which we will certainly pay a visit to at some point. Along the forest trails on the other hand, a myriad of colourful birds living in Iguazú will be the primary focus of our attention. These including the often confiding Surucua and Black-throated Trogons, Red-ruffed Fruitcrow, Blue Manakin, five species of euphonia, Black-goggled and Green-headed Tanagers, White-eyed and Ochre-breasted Foliage Gleaners, Green-billed and Toco Toucans, Spot-

Surucua Trogon by Clayton Burne

billed Toucanets, Southern Antpipit, Spot-backed and Tufted Antshrikes, Maroon-bellied Parakeet, Scaly-headed Parrot, Short-tailed Antthrush and Rufous-capped Motmot - all of which are commonly found.

Less commonly encountered species that we will also search for include Black-billed Scythebill, Solitary Tinamou, Spot-winged Wood Quail, Buff-bellied Puffbird, Rusty-breasted Nunlet and Rufous-thighed Kite and several of the twelve species of woodpecker known to occur in the area.

Urugua-i Provincial Park. On one day, we will endeavour to visit this park sitting adjacent to Iguazú but based at a slightly higher elevation and containing some very interesting sections of bamboo-dominated forest. There, away from the crowd of Iguazú, we will have the chance to explore more trails, in search of Bertoni's and Dusky-tailed Antbirds, White-throated Spadebill, Speckle-breasted Antpitta, Mottle-cheeked Tyrannulet, Southern Bristle-Tyrant, Drab-breasted Bamboo Tyrant, Southern Antpipit and even Green-crowned Plovercrest if luck is on our side.

Puerto Iguazú. Finally, near our base in Puerto Iguazú we will take time to visit a private house where hummingbird feeders normally attract at least seven species of these flying jewels at any given moment! Black Jacobin, Planalto Hermit, Swallow-tailed Hummingbird, White-throated Hummingbird, Gilded Sapphire and Violet-capped Woodnymph being among the most desired but also often joined by Bananaquit and Green-headed Tanager.

The Pantanal. The Pantanal, a huge, gently sloping basin that seasonally inundates with water runoff from the surrounding highlands, is by no means a monotonous expanse of water. Instead, it is a mosaic of woodland, slow-moving waterways, and thousands of drying water pools in the dry season. En route through its northern end, we'll make stops to admire our views of this fascinating landscape and all the birds and animals that gather in sight of the road.

Giant Otter by Rob Williams

We should see our first stately Jabiru (often offering excellent photographic opportunities), Ringed and Amazon Kingfishers, the attractive Scarlet-headed Blackbird, Rufescent Tiger Heron, Savanna Hawk, Wood Stork, Snail Kite, Greater Rhea, Grey-necked

Jaguars by Rob Williams

Wood Rails and Guira Cuckoos, among an impressive assortment of other waterfowl and bank-loads of Yacare Caiman. We will be on the lookout for Red-legged Seriema, Sunbittern and several of the area's less common species, including Maguari Stork, Least Bittern and Chotoy Spinetail.

Combining several boat rides, easy walks along forested trails and a return trip along the entire length of the Transpantaneira, we will sample the full suite of avian gems that call the Pantanal home, not to mention give ourselves the best chance of seeing some of its greatest mammal attractions.

Along the Claro and Cuiba Rivers, for example, we have a decent chance of connecting with both Agami and Zigzag Herons, all five Brazilian kingfishers, the often-inconspicuous Sungrebe and the spectacular Sunbittern, on top of regular sightings of Great Black Hawk, several parrot species, Nacunda and Band-tailed Nighthawks and Pale-legged Hornero.

Naturally, our best chances of seeing Giant River Otter and even the biggest prize of them all, the Jaguar, will be from boats along these rivers, particularly the Cuiaba. Indeed, we will dedicate several boat trips in the Porto Jofre area to finding these magnificent beasts, drawn to the river shores by a seasonal abundance of prey - mostly Yacare Caiman and Capybara!

We will thoroughly cover the other extensive habitats of the Pantanal by accessing them from three separate lodges along the Transpantaneira. One of our lodges is located along a narrow river full of wildlife, currently considered one of the best spots for birding and nature photography in the entire Pantanal. Among the regular visitors to the lodge grounds are Grey-necked Wood Rail, Bare-faced Curassow, Chestnut-bellied Guan, Chestnut-eared Aracari, Toco Toucan, Turquoise-fronted Amazon, White-eyed and Yellow-chevroned Parakeets, Golden-collared and Hyacinth Macaws which even nest near the rooms, Crimson-crested and Pale-crested Woodpeckers, Great Rufous Woodcreeper, Red-billed Scythebill,

Red-legged Seriema by Clayton Burne

Giant Anteater by Rob Williams

Rufous-tailed Jacamar, Saffron Finch, Silver-beaked Tanager and many more! Mammals commonly seen here include Azara's (Hooded) Capuchin, Black-and-gold Howler Monkey, South American Coati, Azara's Agouti and Paca.

A quiet canoe trip along the river may herald Cocoi and Agami Herons, Sungrebe, Sunbittern, Black-collared Hawk, all five species of South American Kingfisher, Black-capped Donacobius, Yellow-billed Cardinal, as well as Yacare Cayman and Giant Otters.

Time spent on the trails may produce Blue-throated Piping Guan, Buff-bellied Hermit, Blue-crowned Trogon, White-wedged Piculet, Planalto Slaty Antshrike, Large-billed Antwren, Mato Grosso Antbird, White-lored Spinetail, Southern Antpipit, Stripe-necked and Pearly-vented Tody-Tyrants, White-eyed Attila, White-naped Xenopsaris, Helmeted and Band-tailed Manakins, Green-backed Becard, Hooded and Grey-headed Tanagers, Flavescent Warbler, Rusty-collared Seedeater, Orange-backed Troupial, and Scarlet-headed Blackbird, just to name a few!

Wooded areas will be searched for Plain Inezia, Rusty-fronted Tody-Flycatcher, Forest Elaenia, Moustached Wren, Golden-green Woodpecker and Narrow-billed Woodcreeper, whilst some of the birding is made much easier by the abundance of feeders, which offer up point-blank views of Nanday Parakeet, Saffron Finch and even Chestnut-bellied Guan, which can often be seen feeding in impressive numbers. The haunting calls of Undulated Tinamou will no doubt greet us daily, though laying eyes on one shall present a rather greater challenge.

Along the Transpantaneira Road itself we will search for the fantastic Hyacinth Macaw, perhaps the grandest and most striking of all the world's parrots, whilst the rest of our time along the dirt track and its over one hundred narrow bridges where we will keep our eyes out for the migrant Maguari Stork, King Vulture, Cinereous-breasted Spinetail, Southern Screamer, Boat-billed Heron, White-wedged Piculet and White-tailed Goldenthroat. The waterbird spectacle is truly something to behold, and we will also dedicate more time to observing the nesting and feedings sites of a variety of herons, spoonbills and storks, all providing for unparalleled photography to boot.

Mammals, aside from the aforementioned Jaguar and Giant Otters, are also a prominent feature of the Transpantaneira, where many are easier to see

Collared Crescentchest by Lev Frid

Green-and-rufous Kingfisher by Lev Frid

than any other place in South America. We stand an excellent chance of seeing the world's largest rodent, the massive Capybara, South American Tapir, localised Marsh Deer, Black-and-gold Howler Monkey, Giant Anteater and even its smaller cousin, the Southern Tamandua. Night excursions will, of course, increase our chances of seeing several of these beasts but may also yield Scissor-tailed Nightjar and two species of potoo.

Chapada dos Guimarães. The region around the small town of Chapada dos Guimarães is most famous, and justifiably so, for its spectacular escarpments and waterfalls. Of greater interest to birders, however, are the great stretches of Cerrado, end even a few well-forested valleys. The Cerrado, a unique savanna confined mostly to Brazil, not only contains a set of fantastic endemic birds, but also a good deal of threatened species of many plant and animal groups - owed mostly to its clearance for swathes of agriculture. Our time will be dedicated mostly to birding this habitat, but also the forested valleys and even some of the well-known tourist attractions.

In the Cerrado itself, Chapada Flycatcher, Collared Crescentchest, Rufous-winged Antshrike, Shrike-like and White-rumped Tanagers, Small-billed Tinamou, Sooty-fronted Spinetail, the delightful Coal-crested and Red Pileated Finches, Black-throated Saltator and perhaps even the sleek Horned Sungem will be the object of our desires, while forested areas will hopefully provide us with sightings of colourful Band-tailed and Fiery-capped Manakins, the endearing Southern Antpipit, Tataupa Tinamou, Sharp-tailed Streamcreeper (which we may locate by its striking calls), Pavonine Cuckoo, Brown Jacamar and the eye-catching Pectoral Sparrow.

The raucous calls of Blue-winged and Red-and Green Macaws, on the other hand, are more likely to welcome us at the scenic Bridal Veil Waterfall or the Geodesic Centre viewpoint, where the scarce Blue Finch and Bat Falcon also occur. Nocturnal birding in the area may also produce several nightjars, including Little and Scissor-tailed Nightjars.

Hyacinth Macaw by Forrest Rowland

Agami Heron by Rob Williams

Pousada Thaimacu. Primarily set up as a fishing lodge, Pousada Thaimacu overlooks the rapids of the Salto do Thaimaçu on the Rio São Benedito. With a comprehensive bird list of over 550 species combined with a phenomenal number of localised and endemic species, this is an absolute bird and wildlife heaven. A superb lodge with delicious food, affording us both comfortable and immediate access to a wonderland of birds and other wildlife.

We'll spend time exploring the environs of our lodge located in pristine forest. The garden normally has blooming *Cecropias*, which attract toucans, aracaris, parrots and fruitcrows. Away from the lodge, we will cover a variety of habitats, including primary tropical forest, mixed savanna with granite outcrops, wetland and seasonally flooded forest. These habitats are accessed by exploring miles of networked trails on foot and cruising the river by boat.

We will endeavour to search out a myriad of fantastic species, with some of our primary targets being the recently described Bald Parrot, poorly known Cryptic Forest Falcon, brilliant Red-fan Parrot and Kawall's

Bald Parrot by Lev Frid

Amazon, Paradise Jacamar, Amazonian Royal Flycatcher, Glossy Antshrike, Tooth-billed Wren, the crepuscular Collared and Rufous-necked Puffbirds, Amazonian Pygmy Owl, Gould's Toucanet and the glittering Pavonine Quetzal. Army ant swarms are also a feature of this region, and congregations of ants often attract a fine selection of lower-story specialties that may include Xingu Scale-backed and Bare-eyed Antbirds, Curve-billed Scythebill, Alta Floresta Antpitta and perhaps the very rare Scaled Ground Cuckoo. The noisy songs of Marbled Wood Quail can often be heard ringing through the forest, as can the screeches of White-bellied Parrots. We will also spend time targeting some very difficult species such as the reclusive Zigzag Heron and fantastic Razor-billed Curassow.

South American Tapir by Clayton Burne

Not far from the lodge is a spectacular 40metre (130 foot) canopy tower that emerges above the trees, offering a sensational view of the surrounding forest. Canopy specialties are most easy to observe from this elevated position, and some of the birds we will be keeping an eye out for include the vivid Pompadour Cotinga, Curl-crested Aracari, Bald Parrot, Long-billed Woodcreeper, Black-girdled Barbet, Brown-banded Puffbird, the bizarre Amazonian Umbrellabird and a kaleidoscope of colourful tanagers and parrots. Impressive Blue-and Yellow, Red-and-green and Scarlet Macaws in flight are a common sight from the towers. Although very scarce, we may be fortunate enough to see the massive Harpy Eagle and a host of other resident raptors.

Red-necked Araçari by Lev Frid

There is also an excellent selection of South American mammals to be found here, and we will maximize our efforts to see the huge South American Tapir, walk past fresh Jaguar and Puma tracks, see hosts of Capybara – the world's largest rodent, Southern Tamandua, several species of opossum, Giant River Otter, Brazilian Agouti, the sleek Tayra and the delicately patterned Paca. Perhaps most impressive is the selection of no less than seven primate species in the area, including Feline Night Monkey, Dusky Titi Monkey, Brown Capuchin, Red-handed Howler Monkey, White-Whiskered Spider Monkey, Snethlage's Marmoset and the endemic Red-nosed Bearded Saki Monkey, all of which are often seen in the surrounding forest. After sorting through the profusion of tyrant-flycatchers, hummingbirds, manakins and antbirds, we will have a chance to enjoy the floating deck in front of our lodge – ideal for swimming and wildlife viewing – before venturing out at night in search of nightjars as well as Crested, Tawny-bellied Screech and the very attractive Black-banded Owl.

Tour Grading & Key

Overall Ease		Moderate. Suitable for all birding / wildlife interest levels and mobility capabilities.
Birding Ease		Moderate. Most species provide good visuals in open conditions, more challenging on the Amazon Extension.
Accommodation		Comfortable to very comfortable.
Walking / Trails		Mostly short walks on flat terrain, interior forest trails on the Amazon Extension.
Vehicles / Roads		Good quality sealed & unsealed roads. Most drives are short. Boat rides last +-4-6 hours per outing.
Photography		Good to excellent. Lots of feeders & opportunities by boat.
Annoyances		Climate can vary from cold in the morning to very hot during the middle of the day.

Financial Arrangements and Important Notes

Tour dates, prices, single supplement, approximate flight costs and tour spaces are displayed on our website.

Tour inclusions:

- All meals from lunch on day one to breakfast on day 5 of the Iguazú extension*;
- All meals from dinner on day 1 to breakfast on day 10 on the main Pantanal tour;
- All meals from dinner on day 1 to lunch on day 6 for those on the Amazon Rainforest Birding extension*;
- All lodgings;
- All ground transportation during the tour**;
- Boat transportation as noted in the itinerary;
- All reserve entrance fees;
- All guiding services;
- Tips for local guides, drivers and services.

*Lunches between the extensions and main tour are provided for guests participating on both tours only. **Iguazu extension – there will be one scheduled group transfer from Foz do Iguacu Airport to our hotel in Iguazú NP at the beginning of the tour, and one scheduled group transfer back to Foz do Iguacu Airport at the end of the tour. Transfers at other times are not included and will be billed for.

Tour exclusions:

- Visa fees;
- ANY flights;
- Any beverages (including mini-bar charges at hotels);
- Optional excursions;
- Special gratuities;
- Telephone calls, laundry and other items of a personal nature.

Single Supplement: The single supplement cost for this tour will be charged if you wish to have single accommodation. If RBL cannot provide you with a rooming partner for these nights although you choose to share, the single supplement will become applicable. We will make all reasonable efforts to ensure that a rooming partner is found if you do wish to share.

Tipping: As noted above, gratuities (drivers, hotel staff, restaurants etc.) are included on this tour. However, this does NOT include your Rockjumper leader/s. If you feel that they have given you excellent service, it is entirely appropriate to tip them at your discretion.

- **Due to constantly fluctuating exchange rates, we quote our tours in 4 currencies. The tour price is fixed only in the currency printed in bold, and the actual cost in the other currencies listed will be adjusted according to prevailing exchange rates at the time of final invoicing. The same applies to approximate flight and single supplement rates.**
- **Rates are based upon group tariffs; if the tour does not have sufficient registrations, a small group supplement will be offered to confirm the tour.**
- **Tour prices are subject to unforeseen increases in tour related costs and may have to be adjusted as a result.**
- **The designated tour leader/s may be changed at short due to unforeseen circumstances.**
- **The itinerary is indicative only. Changes may need to be made to the order in which the tour is conducted, or some of the venues we visit closer to departure. We will attempt to adhere as close to the original program as possible.**

- In some areas it can be hot to very hot depending upon local weather conditions. On most mornings, we will be up and out early to take advantage of the cooler temperatures and wildlife activity before the day warms up.
- This Brazil tour does not require a high level of fitness but participants should be in good general health as some of the forest birding will be done on foot and may require walking for several hours at a time.
- Should you have any physical limitations or medical conditions please notify us in advance of departure.
- There will be a few lengthy drives.
- The vehicles we use are comfortable, although we should expect some bumpy roads depending upon local road conditions.
- Accommodation is generally comfortable throughout the tour although air conditioning is not available in some areas.

Arrival and Departure Details

- Argentina - Iguazu Extension will start and end at Foz do Iguacu International Airport, Brazil (IATA: IGU).
- Brazil - Pantanal Tour will start and end at Cuiaba International Airport (IATA: CGB).
- Brazil - Amazon Rainforest Extension will start and end at Cuiaba International Airport (IATA: CGB).

The above information in respect of arrivals and departures is a guide only. Precise arrival and departure information will be sent to you in your Tour Confirmation package once the tour has been officially confirmed. If you wish to arrive early and/or depart late and would like assistance in this regard, kindly contact the Rockjumper office.

Foz do Iguacu International Airport (IATA: IGU) and Cuiaba International Airport (IATA: CGB) are located within Brazil. They are well serviced by a multitude of flights from major cities within Brazil such as Sao Paulo, Rio de Janeiro and Brasilia.

Visa requirements differ by country, nationality of the traveller and duration and purpose of your intended stay. It may be necessary to obtain a visa or an electronic travel authorization in advance of your travel. It is therefore vitally important that you check with your travel agent/consulate/embassy for exact visa requirements.

DO NOT book any flights until the Rockjumper Team have officially confirmed the tour.
